

Please deliver to Daimler Truck Holding AG headquarters

Cheb, 01. April 2026

**Daimler Truck AG**

Fasanenweg 10  
70771 Leinfelden-Echterdingen  
Germany

Dear Daimler Truck Holding AG Headquarters,

the Minister of Industry and Trade of the Czech Republic announced yesterday that Daimler Truck Holding AG plans to build a new factory in Cheb (Eger) city in the west of the Czech Republic.

The city of Cheb plans to build the factory on arable land owned by the city of Cheb.

I am a citizen of Cheb and I and fifteen thousand of my fellow citizens need this arable land to decarbonize district heating. This arable land will provide us with one third of the necessary heating biomass and will produce half of the annual heat consumption from the solar thermal system.

Thanks to support from the EU Modernization Fund, we will have cheaper heat than today if we do not build the Daimler Truck Holding AG factory but build a solar heating plant and grow biomass. This has been proven in a state study in Cheb.

But the Cheb council deceived the citizens. They did not tell it the citizens.

I believe you understand that we cannot build the Daimler Truck Holding AG factory. We cannot lose our arable land. If we lose it, our energy will not be cheap.

I believe you understand that I am taking legal action against the construction of the factory. The Czech Administrative Court is now dealing with a lawsuit against the construction of the industrial zone — the Daimler Truck Holding AG factory.

I believe you understand that I am taking political action against the construction of the factory. With friends we are founding a political party for the elections to the 2026 municipal council. Our program is to reject the factory on arable land and make energy cheaper.

There are so many people against the factory that it is certain that we will win the elections in the fall of 2026. We will reject the factory. Your investments will be ruined. If you do not wait with them.

I am not responsible for this situation. The Cheb municipal council deceived not only me, but also you.

The energy project is a priority for the citizens of Cheb. Arable land has strategic value for the citizens. It is the oil of the near future. We will not let it be taken away.

The Daimler Truck Holding AG factory in the Czech Republic can stand, but somewhere else. Near Cheb there are anthropogenic soils from brown coal mining. Hundreds of hectares of dead land. The right place for your factory. The city is called Sokolov. We want your factory, but on dead land in Sokolov district.

We have only one planet. Renewable energy must be as cheap as possible. Now it has priority in Cheb.

I challenge you, let's work together and prepare the Daimler Truck Holding AG project better.

Please stop the Daimler Truck Holding AG factory project until the autumn elections of 2026. I believe that after the elections we will meet as friends and plan a new Daimler Truck Holding AG factory in the right place in our great country.

Thank you for understanding me and for remaining friends. I look forward to working together after the autumn elections of 2026.

Please consider this letter public.
